Clinical Trial

We are seeking volunteers for a research study. We are looking to understand how often there is heart injury in COVID-19 patients.

You may qualify to participate in the study if you meet the following criteria:

1) Above 18 years old
2) COVID-19 positive
3) Are able to give informed consent

If you join the study, you will be asked to come to the VAMC to have blood drawn. Based on the lab results, you may be asked to have further medical evaluation including cardiac magnetic resonance (a painless test that uses radio waves and magnets to look for heart injury).

If you believe you meet the study entrance criteria and would like to hear more about study participation, please contact:

Jose Huizar, MD
Principal Investigator
(804) 675-5466

Or

Pamela Summers
Study Coordinator
(804) 675-6831
