

# From the Director

Welcome to the Hunter Holmes McGuire VA Medical Center,  
Service Member Transitional Advanced Rehabilitation (STAR) program.

On behalf of our healthcare team, I want to thank you for considering the STAR program as an option for your rehabilitation. Please be assured we will do all we can to make your rehabilitation process and your experience within this program as positive, productive, and as caring as possible. We offer facilities to accommodate a positive healing environment, and we create therapy programs based on your individual therapy needs.

The STAR philosophy is to work together to maximize function, preserve dignity, and provide support. Our goal is to be the provider of choice for injured or ill Service members and Veterans who will benefit from a structured, transitional rehabilitation program focused on physical health, psychological wellness, vocational retraining, and employment support.

For your convenience, we have created resources on our website to provide you with an orientation to our program. If you have questions or you would like additional information, our staff will be glad to help you.

Sincerely,

William Robbins, M.D.  
STAR Medical Director
